

Power BI Dashboard Review Report

Overview

The uploaded Power BI dashboard contains one report page with 13 visuals.

Detected visuals

- 6 KPI Cards
- 1 Line Chart
- 2 Donut Charts
- 2 Clustered Column Charts
- 1 Slicer
- 1 Text Box

Strengths

1. KPI cards provide an executive summary.
2. Trend analysis is included through a line chart.
3. Category composition is represented using donut charts.
4. Dashboard includes filtering capability using a slicer.
5. Layout appears organized on a single page.

Recommendations

1. Add dynamic titles reflecting slicer selections.
2. Include Top 10 Products and Top Customers as horizontal bar charts.
3. Add Region-wise Sales and Profit visuals.
4. Add tooltip pages and drill-through pages.
5. Maintain a consistent color palette and align all visuals evenly.
6. Add navigation buttons if multiple pages are introduced.

Business Insights to Include

- Highest sales month.
- Highest revenue category.
- Most profitable region.
- Top customer contribution.
- Overall profit margin.
- Average delivery days.

Overall Assessment

Current dashboard demonstrates a solid beginner-to-intermediate Power BI implementation with KPI cards, trend visualization, category distribution and filtering. Adding advanced visuals, DAX measures, drill-through, and storytelling elements would elevate it to a portfolio-ready professional dashboard.
